The National AIDS Centre:

- was established in 1993 as an agency of the Ministry of Health,
- employs 30 people,
- operates on the grounds of the Regulation of the Minister of Health of the 14th of June 2010 in reference to the National AIDS Centre,
- implements tasks stated in the successive Regulation of the Council of Ministers of the 15th of February 2011, on the issue of the National Program for Preventing HIV Infections and Combating AIDS.

ARV TREATMENT :

Since 2001 unified and integrated ARV treatment in all Polish regions has been developed and financed within the framework of the health policy program of the Ministry of Health called “Antiretroviral treatment of people living with HIV in Poland”.

119 children and 5 777 adults are treated in 16 highly specialised centres and penitentiary institutions.

- 150 nurses employed in the hospital taking care of all patients. Medical personnel is responsible for their own and patients' security and treats all patients as potentially HIV+.
- HIV patients are dispersed around the wards, they are by no means isolated from other sick people. The only existing division is between the drug addicts and MSM due to the antagonisms.
- ARV treatment - breakdown in the work of HIV nurses – provides quality of life for the patients and job security for the personnel.

POSITIVES:

- Excellent hospital equipment.
- Medical achievements.
- Strong emotional bonds between them and the patients.

NEGATIVES:

- Limited number of nurses that means little time for trainings, too much work load.
- The nurses have to accomodate to changing epidemic trends basically on their own. Often, the nurses have to provide psychological support for the new infected and their families.
- Indifferent or aggressive attitude to nurses from the side of drug addicted patients.

E-LEARNING

11

E - L E A R N I N G

- The educational portal www.hiv-aids.edu.pl directed to doctors, medicine students, nurses and midwives developed by the National AIDS Centre since 2007.
- It allows to broaden the knowledge and raise professional qualifications on HIV and AIDS.
- Professional trainings offered there are free-of-charge, user data is verified upon registration. Students make use of various forms of education: articles, video lectures, examples of interviews with patients, links to additional materials. There exists a possibility to send a question to an expert.

The screenshot displays the HIV-AIDS.edu.pl website. At the top, it features the logo and name of the National Centre for HIV/AIDS. Below the header, there is a navigation menu with options like 'programy edukacyjne' and 'kursy'. The main content area lists educational programs for various professions: 'Szkolenia dla: ginekologów, lekarzy POZ, pielęgniarek i położnych'. A 'Program edukacyjny' section is also visible, along with a 'Kursy dostępne na portalu dla specjalistów' section which includes a grid of course thumbnails with titles and images.
